Profile

Energetic software developer with a can-do attitude and excellent collaboration skills.

Education

Diploma in Software Development,
Rosebank College
02/2017 – 04/2021

Projects

BookStore Web Application

- I Created an SQL database with Code first Entity Framework (EF).
- Created a RESTful Application Programmable Interface (API).
- Created a front end using Model View Controller (MVC). MVC is a pattern – I used some HTML. This allows the application to be rendered on the browser i also used jQuery which is a javascript library.
- This application taught me Domain Driven Design.

Weather Application

- In this project I created a .net weather app with c#, which uses an API from weatherstack to get weather information all over the world.
- By default it displays the local weather in Johannesburg(South Africa).
- You can also use search to find the current weather at a city, for example London or Paris.
- The app displays local temperature, gives you a brief description and also shows an icon based on the weather.

LawFirm Webpage

- I created a law firm webpage for my portfolio (which can be found on my GitHub repository)
- I used WordPress, PHP, HTML, CSS, and Elementor.
- I created a local server, created the design, and built a custom WordPress theme that works with Elementor.

Skills

🔗 Java

🔗 PHP

🔗 HTML

🔗 ASP.NET

🔗 CSS

🔗 GIT

🔗 Javascript

🔗 Kotlin

🔗 C#

🔗 Sql

Professional Experience

Freelance Web Developer, Fivver
03/2021

- Providing front-end website development using WordPress, Hub-Spot, and other editing software.
- Derived from PHP, SQL, JavaScript, and other backend knowledge to enhance my programming resources.

Freelance Graphic Designer, Fivver
09/2018

- I was in charge of connecting the UI to the API and also optimized the website to make the user experience great
- Technologies used: HTML, CSS and SASS

Freelance Android Developer, Fivver
04/2021

- Devised documentation for the app, detailing operation, functions and capabilities
- Maintained comprehensive techniques to locate bugs and errors in the application for speedy issue resolution.
